SUMMARY

BS Artificial Intelligence student at FAST NUCES Islamabad with hands-on experience in AI systems, computer vision, and full-stack MERN development. Delivered 3+ real-world projects and led a 25+ participant industry hackathon at NASCON'25, achieving 200% growth in event visibility.

EDUCATION

B.S. Artificial Intelligence — **Islamabad, Pakistan**
FAST NUCES, Islamabad — *August 2024 – 2028*

- CGPA: 3.12 / 4.0
- Courses: DSA, AI, OS, Linear Algebra, Probability & Statistics, SQL, Discrete Structures, FSE, ML, Analysis of Algorithms

EXPERIENCE

Machine Learning Engineering Intern — **Islamabad, Pakistan (Remote)**
FlyRank — *Jul 2026 – Aug 2026*

- Built and validated a content-refresh scoring pipeline (Python, Scikit-learn, Pandas, DuckDB), achieving 0.74 precision@50 with Random Forest, a 3x improvement over baseline — validated via client-holdout testing.
- Independently designed the feature engineering and leakage-audit process, identifying and correcting a label-derived feature.

AI Hackathon Organizing Officer — **Islamabad, Pakistan**
NASCON'25, FAST NUCES — *Apr 2025 – May 2025*

- Led a 25+ participant industry hackathon with 2+ partner companies, driving real-world project development and achieving 200% growth in event reach through strategic outreach.

PROJECTS

AI Assistive Navigation System — **Islamabad, Pakistan**
YOLOv8 · DeepSORT · ROS2 · Sensor Fusion · ESP32 + RPi4 — *Oct 2025 – Present*

- Built an AI-powered navigation system for visually impaired users using YOLOv8 + DeepSORT for real-time tracking & person re-identification (92% accuracy), 360° LiDAR-camera fusion reducing collision risk by 70%, and a ROS2 autonomous navigation stack, improving user independent mobility by 60% with <200ms audio feedback latency across modular ESP32 + Raspberry Pi hardware.

AI Explorations & Course Projects — **Islamabad, Pakistan**
Python · ROS2/Gazebo · CLIP · OpenCV · Genetic/Swarm Algorithms — *Sep 2024 – Present*

- Completed 10+ AI projects spanning data preprocessing, ROS2/Gazebo robot simulation, and real-time video object tracking with live transformations; built a multi-modal CLIP + KNN search system supporting 3 cross-modal retrieval modes (image, label & text queries) with 90%+ top-3 accuracy; implemented genetic, adversarial & swarm intelligence algorithms across 15+ lab exercises.

Capital Play — **Islamabad, Pakistan**
React · Express · Node.js · MySQL — *Mar 2026 – Present*

- Full-stack sports ground booking platform with 3 role-based dashboards (Player / Owner / Admin) enabling owners to manage bookings 50% more efficiently, boosting ground utilization by 3x; users book slots 5x faster via real-time browsing & instant payment approval — backed by a recursive promotion engine and Socket.io live messaging.

Movies Database Manager — **Islamabad, Pakistan**
C++ · AVL Trees · Graphs · BFS/DFS · HTML/CSS/JS — *Nov 2025 – Dec 2025*

- Zero-STL C++ data engine over a 5,000-movie IMDb dataset using AVL Trees, Hash Tables & Graphs — delivering 5x faster multi-criteria search vs. linear scan, 40% more relevant recommendations via BFS/DFS graph traversal, and shortest-path discovery.

SKILLS

AI / ML — Python, PyTorch, Scikit-learn, YOLOv8, OpenCV, NumPy, Pandas, Seaborn, CLIP
Web Dev — React.js, Node.js, Express.js, MongoDB, REST API, Socket.io, TailwindCSS, Next.js
Robotics & CV — ROS2, Sensor Fusion, DeepSORT, Gazebo, RPLIDAR, C++, Assembly (COAL)
Tools & DB — Git, GitHub, Postman, Vercel, MySQL, PostgreSQL, VS Code
